Profile

"I am an all-around tech enthusiast with a passion for exploring and mastering various aspects of technology. From web development and software engineering to data analytics and digital design, I thrive on learning and applying new skills across multiple disciplines. With a strong foundation in IT and a knack for problem-solving, I enjoy tackling complex challenges and creating innovative solutions. Whether it's building dynamic websites, developing efficient software, or diving into data to uncover insights, I am always eager to push my boundaries and stay at the forefront of the ever-evolving tech landscape."

Work Experience

July 2024 - Present
KENGEN

ICT security & governance Intern

I assisted in implementing cybersecurity measures, monitored network activities for potential threats, and supported risk assessment procedures. I contributed to policy development by drafting security guidelines, managed user access controls, and ensured compliance with organizational IT governance standards. Additionally, I collaborated with the team to address vulnerabilities and improve data protection strategies.

February 2024 - June 2024
Parliamentary Senate Service

ICT Committee Intern

As a committee member, I conducted research on ICT policies, drafted reports, and managed petitions and statements. I coordinated committee operations, including agendas, meetings, and staff schedules, and provided procedural advice on Senate rules and best practices.

September 2022 - July 2023
Strathmore University

ICT Intern

I provided comprehensive system support and efficient data entry, managed IT logistics for training and workshops, diagnosed software and hardware issues, and implemented necessary network corrections.

September 2021 - January 2022
Agile Business Technology

IT Infrastructure & Solutions Sales Intern

I led tender bidding and prequalification processes, and executed sales and marketing duties.
